

IN THE SPECIFICATION

Please insert the following paragraph on page 1 after the title of the invention and before the "Field of the Invention."

--Related Applications

This application is a national phase of PCT/CN2005/000037 filed on January 12, 2005, which claims priority from Chinese Application No. CN 200410002614.X filed on January 20, 2004, the disclosures of which Applications are incorporated by reference herein. The benefit of the filing and priority dates of the International and Chinese Applications is respectfully requested.--

The following paragraphs will replace all prior versions of themselves in the specification of the application.

1) Page 10, paragraph 37, lines 15 to 18, please make the following deletion:

~~Therefore, an aspect of the present invention aims to provide a system for ensuring quality of service in a virtual private network and a method thereof, so as to provide a practical solution for MPLS VPN QoS problems.~~

2) Page 11, paragraph 41 lines 6 to 7, please make the following change:

Preferably, the bearer control network includes centralized resource controllers for managing network resources in the logical bearer network, maintaining network topology of the logical bearer network, perform resource calculation and route selection, sending route indications to the routers, allocating resources and performing access control in the logical bearer network, and maintaining membership information and connectivity information for each the virtual private network, so as to implement automatic detection and unilateral configuration of the membership.

3) Page 16, paragraph 80, lines 13 to 14, please make the following deletion:

~~To make the object, technical solution and advantages of the present invention more~~
~~clear,~~ h Hereinafter embodiments of the present invention are described in detail with reference
to the attached drawings.
